

Stock Vitrabond. Save Cash. Build Without Waiting.

The Vitrabond Consignment Program puts a full supply of FR ACM and Edgeline flat stock in your shop without upfront material cost.

MORE MATERIAL ON HAND. LESS CAPITAL TIED UP.

Your Shop Shouldn't Run on Luck.

Every ACM fabricator knows the drill: you win a project, scramble to order material, absorb freight costs on a partial load, and then wait. If pricing has shifted since your bid, that's your problem.

The Vitrabond Consignment Program changes the equation.

We ship a full truckload or partial truckload of Vitrabond FR sheets and color-matched Edgeline flat stock directly to your shop in a mutually agreed finish mix. You pay only freight upfront. Material is invoiced monthly as pallets are opened, not when they arrive.

The result: inventory ready when you are, cash flow that works with your business, and pricing locked for the life of the program.

HOW IT WORKS

STEP 1: *Apply for a Consignment Account*

Approved fabricators are onboarded into the program and work with our team to select a finish mix that fits their typical project profile.

STEP 2: *We Ship to Your Shop*

Fairview delivers a truckload (or partial truckload) of Vitrabond FR ACM sheets and Edgeline flat stock directly to your facility or warehouse.

STEP 3: *Use What You Need, When You Need It*

Pull from your in-house consignment stock for any project — no purchase orders, no lead times, no waiting.

STEP 4: *Pay Monthly as You Use It*

Material is invoiced each month based on pallets opened. Any unopened inventory at the end of the consignment term (~12 months) is invoiced at that time.

Program Benefits:

- ✓ **No Upfront Material Cost:** Pay for what you use, as you use it. Protect your cash flow without sacrificing supply.
- ✓ **Fixed Pricing for the Full Term:** Lock in your cost today. No surprises, no mid-project price increases.
- ✓ **Bulk Pricing on Every Job:** Unlock truckload-level pricing across all your projects throughout the year, even smaller ones.
- ✓ **Dramatically Lower Freight Costs:** One truckload delivery replaces multiple smaller orders throughout the year, cutting your shipping expenses significantly and putting those savings straight back into your margin.
- ✓ **Color-Matched Edgeline Flashing Included:** A complete, coordinated cladding solution in one program.
