Arrowhead® Rainscreen 1" Insulated

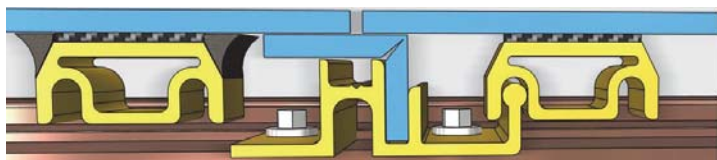

Arrowhead® Rainscreen Custom Depth

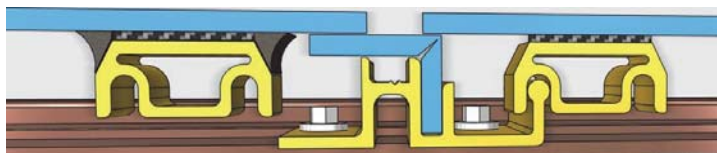

The Arrowhead® Flush Panel System

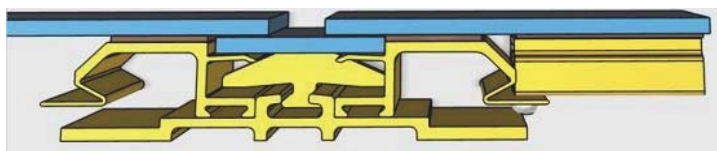

Arrowhead® Flush Panel System Vertical Joint

Arrowhead® Flush Panel System Non-Progressive

Arrowhead® Flush Panel System Horizontal Joint

Why Arrowhead®

Introducing the Arrowhead® family of Architectural Panel Installation Systems

Fairview Architectural North America is the only ACM/MCM manufacturer to offer a complete facade package with patented and patent pending products. This package includes versatile facade materials, fully tested labor-saving installation systems and manufacturer's in-house training programs.

REVOLUTIONARY

These patented and patent pending Arrowhead® installation systems are the only true non-progressive tested AAMA 508 and AAMA 509 compliant Rainscreen systems for metal panel facades.

TIME SAVING

Shorten your project schedule by reducing stages in the drafting process and eliminating re-verification of field measurements.

VERSATILITY

Add some complexity to your facade design by varying the depth of the panels, while using the same simple mounting system and no job-specific tooling.

COST-CUTTING

Because Arrowhead® systems are fast and easy to fabricate and install, it can be done in days versus weeks, significantly reducing labor costs.

NON-PROGRESSIVE

"Any panel in any sequence" eliminates getting stalled by other trades on the job site. Tight schedule? Add more crews on the same wall. Damaged panel? Simply remove and re-install without compromising the quality, fit or integrity of the system.

"The Arrowhead® Panel System is the only non-progressive dry rainscreen panel system that is AAMA 508 and 509 compliant. This means that any single panel can be removed and replaced if damaged, without requiring any adjacent panels to be removed."

We are Unique

“Fairview Architectural North America is the only ACM/MCM manufacturer to offer a complete façade package consisting of versatile façade materials, fully tested labor saving installation systems and manufacturer’s in-house training programs.”

Arrowhead® Training

Fairview offers a comprehensive Training Program taught by industry experts at the

Fairview Architectural Training Center in Bloomfield, CT.
