

Install in Any Order.

The 4-Step Arrowhead Installation Guide

Save up to 50% in labor time and eliminate costly project delays.

FAST. SIMPLE. PROVEN.

The Problem

with Traditional Façade Installation

Every installer knows the frustration of waiting — waiting on other trades, waiting for zones to open, waiting for inspectors.

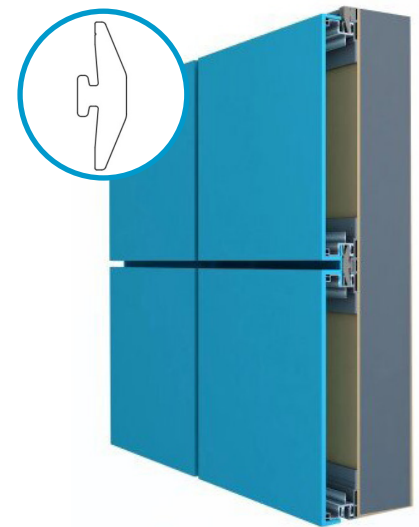

Sequential installation forces you to follow a rigid order that leaves crews idle and projects behind schedule.

The Arrowhead

Solution

Arrowhead's patented **T-Clip system** eliminates those constraints. Our design allows installers to place panels in **any order, at any time**, keeping your crew productive regardless of surrounding trades.

Whether you're working on a high-rise, retail complex, or institutional project, Arrowhead helps you **cut installation time in half**, reduce rework, and deliver pristine façades faster than ever before.

Key Benefits:

- ✓ Install in any sequence, zero downtime.
- ✓ Achieve up to **50% labor savings**.
- ✓ Lightweight, code-compliant system (AAMA 508/509 tested).
- ✓ Easy to learn — minimal training required.

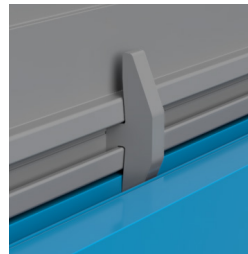

STEP 1: *Mount the Base Rail System*

Align rails to the approved substrate using manufacturer spacing guidelines. Pre-mark T-clip positions to streamline workflow.

Pro Tip: Pre-install rails on multiple elevations to keep crews moving while other areas are being prepped.

STEP 2: *Install Panel and Secure with T-Clip*

Position the panel and fasten the T-clips at designated points along the rail. Their pre-engineered tolerances ensure perfect alignment and structural security.

STEP 3: *Insert Splines and continue panel installation in any order.*

Insert splines to align reveals and ensure a clean, uniform finish. Then continue installing panels in any direction — left, right, or up — to keep crews moving without delay.

STEP 4: *Peel the protective film*

Once the façade is complete and inspected, remove the protective film to reveal the finished surface.

Installation Complete:

A seamless façade, faster than ever — no bottlenecks, no idle time, no compromises.
