

## CASE STUDY

# Coney Island Hospital

**LOCATION:** CONEY ISLAND, NY  
**SQ FT:** 125,000  
**ARCHITECT:** NBBJ  
**GENERAL CONTRACTOR:** TURNER CONSTRUCTION COMPANY, MCKISSACK & MCKISSACK  
**PRODUCT:** VITRAPLATE®

The Coney Island Hospital (CIH) underwent a significant renovation, demolition and rebuild due to extensive flood damage caused by Hurricane Sandy.

The impressive LEED silver structure features a custom bright silver metallic finish on Vitraplate® 3mm (1/8") prefinished solid aluminum plate, which is utilized in both the curtain wall and as exterior metal wall panels.

The angled panels add depth and shadow lines, creating a visually striking effect while maintaining a uniform color throughout.

### FINISH

Custom Bright  
Silver Metallic

**vitraplate**   
PREMIUM NON-COMBUSTIBLE CLADDING

**Non-Combustible:** Exceed stringent wall assembly fire codes and minimize design risks with Vitraplate®, all while achieving unparalleled finish quality and capabilities.

The non-combustible feature of solid aluminum plate ensures your designs meet the highest safety standards without compromising on design and finish warranty.

The angled panels add depth and shadow lines, creating a visually striking effect while maintaining a uniform color throughout.
